Title of the Challenge

Smart Client News Feed for Connecting Students

What is the main issue the challenge addresses?

Sports schools lack an integrated platform that fosters community engagement among students and team members while enabling schools to share extracurricular activities and updates effectively. Current systems often rely on fragmented communication channels, which can lead to missed opportunities for networking and inefficient event planning.

This challenge aims to create a news feed within our booking system that allows:

- Students to connect with each other and join the school's community.
- Schools to publish and promote additional activities or events, such as leisure activities and team meetings.
- Participants to sign up for posts or events, streamlining coordination and improving event management.

Call to Action

Develop an interactive, user-friendly news feed for our booking system. The feed should include features for publishing posts, event sign-ups, and personalized notifications. Ensure seamless integration with existing scheduling tools to enhance communication and engagement.

What is the desired impact of the challenge?

- Foster a sense of community among students and team members
- Enable schools to promote additional activities, boosting engagement and customer satisfaction
- Simplify event planning and improve internal communication for staff and participants
- Provide a centralized, efficient platform for all extracurricular offerings.
